AN EXCLUSIVE P&C PARTNERS ASSIGNMENT

ABOUT DYNO NOBEL

Dyno Nobel (ASX: DNL) is a global leader in commercial explosives, blasting systems and mining services. With a history dating back 180 years to the pioneering work of Alfred Nobel, Dyno Nobel services major mining and infrastructure customers across six continents. Following the demerger of its fertilisers business and the rebranding of Incitec Pivot as Dyno Nobel, the company is now a focused, independent ASX-listed entity backed by a world-class team of engineers, operators and corporate professionals.

GLOBAL BUSINESS STRUCTURE

Dyno Nobel operates through four business units spanning the Americas, APAC, EMEA and Latin America. The APAC segment is the largest by earnings and sits at the heart of the Brisbane finance transformation.

BUSINESS UNIT	COVERAGE	FY25 EBIT
Dyno Nobel Asia Pacific (DNAP)	Australia, Indonesia, Malaysia. Metallurgical coal, iron ore, base and precious metals. Moranbah AN plant and Helidon initiation systems.	**$255m (+8%)**
Dyno Nobel Americas (DNA)	US, Canada, Mexico. Quarry and construction, base and precious metals, coal. Cheyenne and Louisiana AN plants.	**$189m (+13%)**
Dyno Nobel EMEA & LATAM (DNEL)	France (Titanobel), Turkey (Nitromak), Africa, Latin America. First full year as standalone segment.	**$31m (+33%)**
Fertilisers Asia Pacific	Phosphate Hill manufacturing (QLD). Distribution divested to Ridley Sep 2025. Sale of Phosphate Hill ongoing.	**Exiting**

FINANCE TRANSFORMATION

Dyno Nobel is executing one of the most significant finance transformations currently underway in the Australian market. This is not a relocation exercise or a backfill of existing roles — it is a deliberate, strategic rebuild designed to modernise finance capability and integrate it more deeply into the commercial life of the business.

- Moving the core finance hub from Melbourne to Brisbane, placing finance closer to operational centres of gravity
- Establishing new team structures with clear accountabilities across technical accounting, business partnering and strategic finance
- Embedding finance professionals from manufacturing plants and regional operations through to executive decision-making
- Strengthening the ability to manage capital, forecast performance, deliver commercial insight and maintain world-class governance

BRISBANE BASED OPPORTUNITIES

As Dyno Nobel transitions its head office to Brisbane, a number of finance and risk positions are now available locally. These roles represent an important step in establishing Dyno Nobel's Brisbane presence and building a finance team fit for the next phase of growth. Dyno Nobel has partnered exclusively with P&C Partners to lead this search, ensuring a rigorous, market-wide process for every role.

ROLES AVAILABLE

More than 15 roles are available across finance, risk, insurance and technology — spanning early-career through to senior leadership. Many roles carry a global mandate and direct exposure to the executive leadership team.

- DNAP Strategy Associate
- DNAP Management Accountant
- DNAP Financial Controller

WHAT DYNO NOBEL IS LOOKING FOR

This transformation will only be successful with the right people. Dyno Nobel is building a high-performing finance team of individuals who bring technical excellence and a genuine commercial mindset.

Technical Excellence	CA/CPA qualified (or equivalent) with deep expertise in accounting, controls, FP&A, audit or tax.
Commercial Mindset	The ability to translate numbers into strategy and communicate financial insight to non-finance stakeholders.
Curiosity & Collaboration	Hands-on, inquisitive people who work well across teams and functions.
Relevant Experience	Background in industrial, mining or large-scale complex organisations preferred but not required.
Drive to Build	People who want to be involved in the creation of something impactful, not just maintain the status quo.

WHY JOIN NOW?

This is a rare and compelling career moment. Dyno Nobel is not hiring to maintain the status quo. Finance is becoming a key lever for business performance, operational efficiency and strategic growth. The organisation is backing its people, investing in new capability, and offering a genuine chance to shape how finance partners with the business.

COMING FROM **Public Practice**	Your first commercial role with immediate operational exposure and a clear path to leadership.
SEEKING **Broader Scope**	A new challenge with real commercial influence, greenfield mandates and direct access to the executive team.
READY FOR **Strategic Leadership**	A transformation environment where your decisions will shape the structure of a world-class finance function.

FY26 OUTLOOK

The finance function you are joining is not static. Dyno Nobel enters FY26 with strong momentum and a clear growth mandate — meaning the roles being created now will carry increasing scope and visibility as the business scales.

EBIT GUIDANCE	CAPITAL EXPENDITURE	TRANSFORM. TARGET	H2 WEIGHTING
$460–500m	**$280–330m**	**65–75%**	**~60%**
Explosives group	Sustenance, turnarounds & growth	Of $300m EBIT target by FY26 end	EBIT weighted to second half

WHAT THIS MEANS FOR THE ROLES BEING RECRUITED

Dyno Nobel is investing $280–330 million in capital in FY26 alone. The finance function being built in Brisbane will sit at the centre of how that capital is approved, tracked and reported. The transformation program — targeting $300 million in total EBIT improvement — is less than halfway complete. The people joining now will help deliver the second half. These are not maintenance roles. They are roles built for a business in active transformation, with direct access to the outcomes that matter.
